

WHAT IS CLAIMED IS:

1. An accessory for a vehicle having a wheel with spokes, said accessory comprising:

a vibratory member configured to be vibrated by the spokes of a rotating wheel; and

a main body supporting said vibratory member on said vehicle, said main body further comprising an identity plate.

2. The accessory of claim 1, wherein said identify plate bears identification numbers.

3. The accessory of claim 2, wherein said numbers are stickers.

4. The accessory of claim 1, wherein said vibratory member snaps into a socket on said main body.

5. The accessory of claim 4, wherein flexible tabs on said vibratory member are configured to snap fit between inner and outer rings of said socket.

6. The accessory of claim 4, wherein said vibratory member is configured to snap into said socket at a variety of angles with respect to said main body so as to accommodate differently sized bicycles.

7. The accessory of claim 6, further comprising notches disposed around a periphery of said socket for receiving tabs disposed around a periphery of said vibratory member, said notches corresponding to said variety of angles.

8. The accessory of claim 1, wherein said accessory comprises three points at which said accessory is attached to a bicycle.

9. The accessory of claim 8, wherein each of said points comprises a zip tie threaded through said main body.

10. The accessory of claim 8, wherein at least one of said points comprises a plurality of holes disposed around a periphery of a protrusion such that a said zip tie can be threaded through said holes a plurality of angles with respect to said main body.

11. The accessory of claim 1, further comprising a zip tie threaded through said main body for attaching said accessory to said vehicle.

12. The accessory of claim 1, wherein said identity plate comprises one or more removable panels attached to said main body.

13. The accessory of claim 1, wherein said vibratory member comprises a base and a flexible extension, wherein said flexible extension is split into two or more portions.

14. The accessory of claim 13, wherein said splits are tapered, narrowing toward said base.

15. The accessory of claim 13, wherein a corner of one or more of said portions is rounded.

16. A packaged kit comprising:
an accessory for a vehicle having a wheel with spokes, said accessory comprising;
 a vibratory member configured to be vibrated by the spokes of a rotating wheel; and
 a main body supporting said vibratory member on said vehicle,
 said main body further comprising an identity plate; and

a variety of identification indicia or decorative elements that can be selectively disposed on said identity plate.

17. The kit of claim 16, wherein said variety of identification indicia or decorative elements comprise a sheet of stickers.

18. The kit of claim 16, wherein said variety of identification indicia or decorative elements comprise numbers.

19. An accessory for a bicycle having a wheel with spokes, said accessory comprising:

means for generating sound in response to rotation of said wheel; and

a main body supporting said means for generating sound, said main body further comprising an identity plate;

wherein said accessory is configured to attachment to a frame of said bicycle.

20. The accessory of claim 19, further comprising a variety of identification indicia or decorative elements that can be selectively disposed on said identity plate.
